Technical Skills

Languages: Java, JavaScript, SQL, HTML/CSS

Technologies/Frameworks: Nodejs, Expressjs, MySQL, DynamoDB, MongoDB, Reactjs, knex

Education

VIT Bhopal University

Bachelor of Technology in Computer Science

Oct. 2023 – ongoing

CGPA: 8.86

St.Raphael's H.S. School

Class 12th

April 2022 – May 2023

Percentage: 83.5

St.Raphael's H.S. School

Class 10th

April 2020 – May 2021

Percentage: 93.2

Experience

amasQIS.ai, International Internship Programme

June 2025 - ongoing

Software Developer Engineer (SDE)

- Engineered the entire Employee Dashboard, implementing features like real-time punch-in/out and leave tracking, which improved workflow efficiency for over 500+ users.
- Built the backend logic and integrated the frontend for various modules, including personal information and performance analytics, reducing data retrieval time by 30 percent through optimized MongoDB aggregation pipelines.

Infinnights Fin-tech Private Limited

May 2025 – June 2025

Software Developer Engineer (SDE)

- Architected and built a full-stack web application for booking advertisements online using the MERN stack deployed on AWS. The platform supported real-time scheduling for over 100+ ad slots, with a user dashboard for tracking bookings, payments, and analytics.
- I integrated Amazon DynamoDB, enabling scalable data handling with sub-50ms latency, and implemented backend optimizations that reduced API response times 30 percentage.

Projects

HR and Project Management System (SaaS) - (Link)

July 2025

- A dynamic, multi-tenant HRMS built on the MERN stack, TypeScript, and WebSockets, capable of real-time data sync for 50+ organizations.
- Includes separate, role-based dashboards for Admins, HR, and Employees, reducing the need for manual communication by 60 percent.
- Implemented a comprehensive system to manage employee data, attendance, leaves, and performance for organizations with 1000+ employees.

Android Club - (Link)

September 2023

- Developed the official club website using a React.js, Express.js, and Firestore tech stack. The site is hosted on Firebase Hosting and uses a GitHub Actions CI/CD pipeline to ensure seamless and reliable deployments, achieving 99.9 percent uptime..
- Features include dynamic event pages, member showcases with Spline 3D models, a blog section, and admin dashboards for streamlined management.

Achievements

Hacktoberfest

October 2024

Contributor

- Successfully participated in Hacktoberfest, merging 4 pull requests across 2 open-source repositories, contributing to projects in HTML, CSS, and JavaScript..

Kriyeta 3.0: National-level Hackathon

June 2024

Participant

- Built a feature consolidating user assets, increasing adoption by 25 percent 10+ users.

LeetCode: Rating: 1460+

Data Structure and Algorithm Practice

- Solved 170+ DSA problems, achieving a 1460+ rating through consistent competitive practice
